

ACI Worldwide OpenCart Extension Installation

Overview

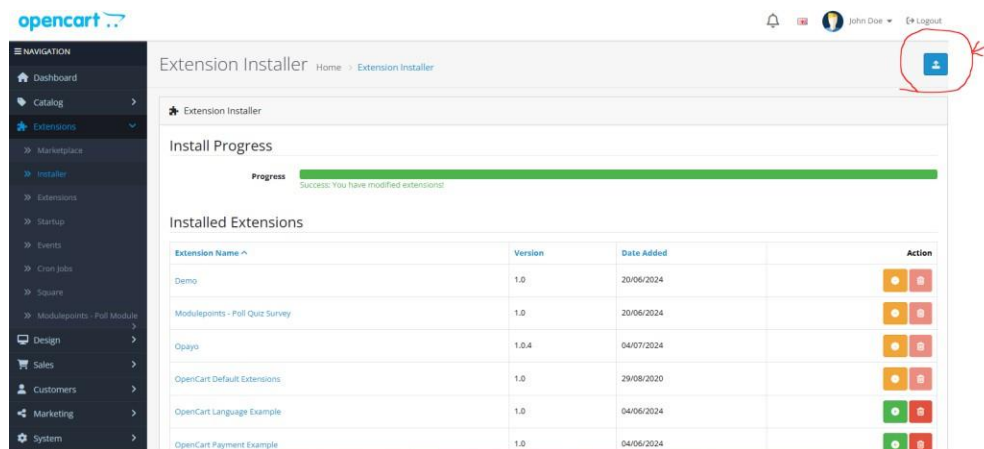

This documentation provides detailed steps to install the ACI Worldwide Payments plugin in your OpenCart store. By integrating ACI Payments, you can offer a secure and seamless payment experience for your customers, supporting various payment methods and enhancing the overall checkout process.

Follow this guide to ensure a smooth setup, enabling you to leverage the full capabilities of ACI Payments in your online store.

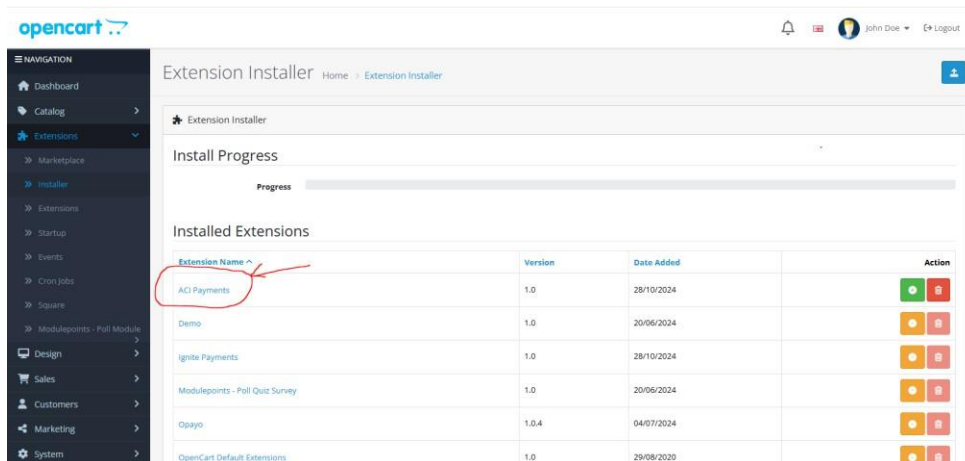

Installation from Marketplace

To install ACI Payments extension from Opencart marketplace, please follow the below instructions

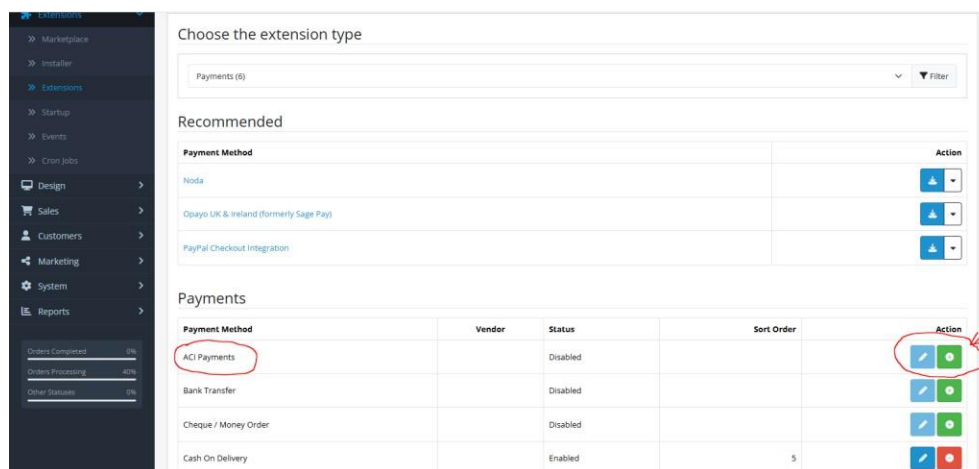

1. Go to opencart marketplace - <https://www.opencart.com/index.php?route=marketplace/extension>
2. Download the ACI payments extension.
3. Go to Admin -> Extensions -> Installer page and upload the aci_payments.ocmod.zip file downloaded in previous step.

4. Install the ACI payments extension from uploaded extensions list.

5. Go to Admin -> Extensions -> Extensions page and select Payments from dropdown.

6. Install the ACI payments extension from payment extensions list. You can now edit ACI Payments settings.

Additional Information -

1. ACI payments recommends using one currency (store default) per store. If multiple currencies are used there could be minor rounding off errors if you do multiple partial captures or multiple partial refunds over a single order.
2. ACI payment expects you are using 2 decimal precisions for displaying amount in your store.
3. ACI payments will set order status as 'processing' and 'processed' for authorized and captured orders respectively.
4. ACI payments extension requires Ignite Payments extension for proper working. ACI payments will automatically install Ignite payments during installation.

Note - Please do not edit Ignite Payment settings or uninstall it. It may interfere in ACI payment installation working.

To uninstall ACI payments

ACI payments can be uninstalled following the normal opencart extension uninstall steps. Ignite payments will be automatically uninstalled along with this.

1. Uninstall ACI payments from Admin -> Extensions -> Extensions -> Payments
2. Uninstall ACI payments from Admin -> Extensions -> Installer

Installation from Opencart Cloud Marketplace

To install ACI payments from Opencart marketplace, please follow the below instructions.

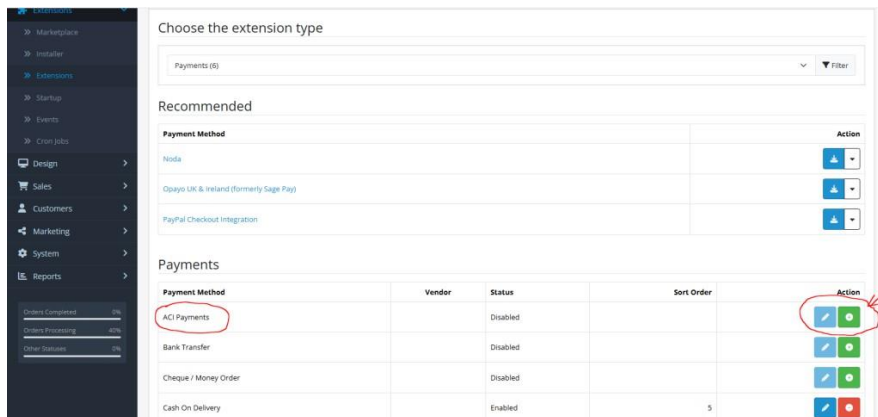

1. Search ACI Payments module from cloud marketplace and go to the download tab. Then click to download the ACI payments extension.

OpenCart Language Example	1.0	04/06/2024	
OpenCart Payment Example	1.0	04/06/2024	

1. Verify Installation:

- Once the installation is complete, verify that the plugin is active and functioning correctly. You can usually find it under the “Apps” section in your OpenCart dashboard.

2. Configuration and Setup:

- Depending on the plugin, you may need to configure additional settings. Refer to the plugin’s documentation or support resources for detailed setup instructions.
