

ACI Adobe Commerce (Magento) Extension Installation

Overview

This document provides instructions to install the ACI Adobe Commerce extension (Magento) from the Adobe Commerce Marketplace, follow these steps:

Prerequisites

1. **Magento Access Keys:** You will need public and private access keys from your Magento Marketplace account.
2. **SSH Access:** Ensure you have SSH access to your Magento installation.

Steps

Get Magento Marketplace Access Keys:

- Visit the Magento Marketplace.
- Log in and navigate to My Profile.
- Under Access Keys, create a new set of keys if you don't already have one.
- Copy the public key and private key. These will be needed for the installation.

Purchase or Download the Extension:

- Go to <https://commercemarketplace.adobe.com/aciworldwide-payment.html>
- Purchase the extension. Ensure the extension is compatible with your Magento version.

Install the Extension via Composer:

- a. Connect to Your Magento Server via SSH:
 - Open your terminal (Mac/Linux) or a program like PuTTY (Windows).
 - Connect to your server using SSH.
- b. Go to Your Magento Root Directory:

Authenticate Magento Marketplace:

- Run the following command to authenticate with your access keys:
 - `composer require aciworldwide/payment`
- Update Composer:
 - If prompted, confirm to allow composer to install the extension
 - `composer update`

Run Magento Upgrade Commands:

- php bin/magento setup:upgrade
- php bin/magento setup:di:compile
- php bin/magento setup:static-content:deploy -f

Clear cache

- php bin/magento cache:clean
